DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-13, 15, 16, 18-20 and 23-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Yuen (US 5,906,143).

Yuen discloses an ink cartridge opener comprising all the claimed elements including, *inter alia*, a first portion (e.g. at 52 or 50); a second portion (e.g. at 52 or 50); and both portions have openings as shown in Figs. 1-3.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3, 14, 17, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yuen (US 5,906,143) in view of Hayao (US 5,845,682).

Yuen discloses the invention substantially as claimed except the first portion of Yuen lacks a plurality of ridges extending as claimed. However, Hayao teaches another

apparatus for refilling an ink cartridge comprising an opening (16) with a plurality of ridges (16a) extending along at least one side of the opening for the purpose of providing a better grip on the cartridge to be opened. See whole patent. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Yuen with the ridges as taught by Hayao in order to facilitate enhanced gripping of the cartridge to be opened.
